

The CNet CIC-901L is an advanced and feature rich IP camera suitable for home and small office surveillance and security needs. With CIC-901L users can view images and hear audio from anywhere on the network. The product is easy to install and configure using IPCam configuration software that automatically detects and provides IP address for connecting to the camera. With built-in motion detector, CIC-901L can be configured to send alarm notification via FTP and e-mail. In addition, the GPIO ports on the camera can be used to receive external trigger as well as sending out signals to activate external alarm systems.

## KEY FEATURES

- Flexible Motion Detection and Image Recording functions
- Email and FTP notification for Motion Detection
- Night vision detectible with 8 IR LEDs
- Internal and external trigger through GPIO ports
- Support static IP, DHCP, PPPoE, DDNS, NTP
- Built-in microphone adds voice to video
- 2 level user management administrator/user

## PRODUCT SPECIFICATIONS

Model Number	CIC-901L
CPU	MIPS/JPEG encode chip (VGA)
Lens	CMOS VGA Sensor with 307,200 pixels
Picture Format	640x480(VGA), 320x240(QVGA), 160x120 (QQVGA)
FPS	Up to 25fps@QVGA, 15fps@VGA
Video Compression	M-JPEG
Audio Compression	PCM 64Kbit
LED	Power, LAN, WLAN
IR LED	8(Auto/Manual)
GPIO	Sensor-in x 2, Alarm-out x 1
Reset Button	Yes
Network Interface	RJ-45, 10/100Mbps Fast Ethernet connection
Power	5V DC 2A
Operating Temperature	32°F-122°F (0°C to 50°C)
Operating Humidity	20% to 80% Non-condensing
Dimension	6.8 x 3.4 x 2.9 inches (17 x 8.5 x 6.5 cm)
Weight	0.56lb, 254.5g
